

International Law Campaign

With our "world-wide growing memorial for international law" we want to:

- Point out the catastrophic undermine of the ban of force in the UN-Charter, which goes along with the behaviour and the preventive argumentation of the nations , who started a war against Iraq in March 2003, contrary to the overwhelming majority of the nations and without any mandate of the Security Council.
- Give everyone the opportunity to make his contribution to the **manifestation of our world's people's will for the solution of international conflicts without the means of force and war.**
- As reaction to the invitation from the Mayors for Peace - and in deep respect to their engagement -, while the last year before the 60th anniversary of the atomic bomb dropping on Hiroshima and Nagasaki at August 6th 2005, to give everyone at the same time the opportunity to manifest with his contribution to the growing memorial **his will for an immediate starting of concrete steps for the implementation of the duty, according to International Law, to the abolition of all nuclear weapons.**
